

EXPERIENCE

- 2023 – **PlantingSpace**, *R&D Scientist*
Developing our own blend of symbolic AI and Bayesian inference for program synthesis. Applied category theory for explainable artificial intelligence and natural language processing.
- 2019 – 2024 **Quantinuum**, *R&D Scientist (part-time)*
Pioneering quantum natural language processing and category theory for quantum ML. [1]
Software: **DisCoPy**, the Python toolkit for string diagrams (main author), **lambeq** (author).
- 2022 – 2023 **Laboratoire d'Informatique & Systèmes**, *Post-Doctoral Researcher*
Formal methods for quantum cellular automata and distributed quantum computing.
- 2022 **Le Lab Quantique**, *General Manager*
Administration of a French nonprofit that promotes the emergence of quantum technologies.
- 2017 – 2018 **Teklia & IRHT (CNRS)**, *Data Scientist*
Deep convolutional neural network for the layout analysis of pages from medieval manuscripts.
- 2015 – 2016 **Tinyclues**, *Machine Learning Engineer (internship)*
Tensor factorisation of complex relational data for email targeting on ~100M users.
- 2014 – 2015 **Yonderlabs**, *Data Scientist (internship)*
Probabilistic graphical models for sentiment analysis, training my first neural word embedding.

EDUCATION

- 2018 – 2022 **University of Oxford**, *D.Phil. Computer Science*
Thesis: “Category Theory for Quantum Natural Language Processing”.
Wolfson Harrison UKRI Quantum Foundation & Oxford-DeepMind Graduate Scholarship.
- 2016 – 2018 **University of Oxford**, *M.Sc. Mathematics & Computer Science*, Distinction
Thesis: “Categorical compositional distributional question, answer & discourse analysis”. [2]
- 2012 – 2015 **University of Oxford**, *B.Sc. Computer Science*, First-Class Honours
New College Scholarship. *Thesis*: “Equilibrium Checking in Reactive Modules Games”. [3]
